REPORT

From the Desk of Chairman

The Novel Coronavirus, a microscopic being, that has transcended every border of every country and spread to every continent has now affected vast majority of global population. Due to the outbreak of Corona Virus, we have been forced to confine ourselves within the four walls of our homes but the zeal of MCKV family was never affected by the pandemic. All the stakeholders of MCKV Institute of Engineering worked hand in hand and nothing could shake the indomitable spirit of our Institution and those who are associated with it. MCKV Institute of Engineering received the Best Engineering College Award for “**Industrial Interface**” from Zee 24 Ghanta Education Excellence 2021. Our Institution has also received the prestigious award of “**Best Institute for Promoting Industry Academia Linkage**” by ASSOCHAM at the “Edumeet 2021-National Conference Excellence Awards for Education and Skill Industry”.

Every dark cloud has a silver lining, and our students and our faculty members made use of every bit of opportunities to the best of their abilities. They have attended many online workshops, webinar regularly to nurture their knowledge. In this pandemic year also, we could place 88% students of 2021 passing out batch. It is our proud privilege that we have organised different Short Term Training Program and Faculty Development Program on different emerging area like Business Analytics, Big Data Analytics and Data Science. MCKVIE has signed a MoU with Engineering Institute of Technology (EIT), Perth, Australia this year. Our Institution has arranged Covid Vaccination Drive also. Rotaract club organised different drive to fight against this Corona Virus and initiated different social awareness program despite of huge impediment. The Annual Report of 2021 at a glance will provide insights into various academic and non-academic activities of MCKV Institute of Engineering.

Quality in Education and Holistic Development at MCKVIE

Any approach to education must ask itself, what is the goal of education? Holistic education aims at helping students be the most that they can be. **Abraham Maslow** referred to this as "*self-actualization*".

At MCKVIE, Education is cared with a holistic perspective, we are concerned with the development of every person's *intellectual, emotional, social, physical, artistic, creative and spiritual potentials*. It seeks to engage students in the teaching/learning process and encourages personal and collective responsibility.

MCKVIE understands education is a philosophy of life based on the premise that each person finds identity, meaning, and purpose in life through connections to the community, to the natural world, and to humanitarian values such as compassion and peace.

We aim to call forth from people an intrinsic reverence for life and a passionate love of learning.

The term holistic education is often used to refer to the more democratic and humanistic types of alternative education.

"At its most general level, what distinguishes holistic education from other forms of education are its goals, its attention to experiential learning, and the significance that it places on relationships and primary human values within the learning environment."

What MCKVIE conceives, Holism in general is the idea that all the properties of a given system in any field of study cannot be determined or explained by the sum of its component parts. Instead, the system as a whole determines how its parts behave. A holistic way of thinking tries to encompass and integrate multiple layers of meaning and experience rather than defining human possibilities narrowly.

Our India recognized the supreme value of education in human life. The ancient thinkers felt that a healthy society was not possible without educated individuals. They framed an educational scheme carefully and wisely aiming at the harmonious development of the mind and body of students. What they framed was a very liberal, all-round education of a very high standard, calculated to prepare the students for a useful life in enjoying all aspects of life. This is essentially a universally applicable educational framework highlighting the purpose of human life and interconnectedness at all levels of existence as a basis of human values. Insights from ancient Indian educational system are of great help in facilitating the production of a creative, ethical and a learning mind, which will concern itself not only with greater 'progress', but primarily or more importantly with the inner transformation of the human consciousness.

I wish Team MCKVIE excelling in all its future ventures.

Prof. (Dr.) Parthasarathi Chakraborty
CEO, MCKV Group

From the Desk of Principal

It is with great pleasure I announce that the annual report of 2021 of MCKV Institute of Engineering is now published. The report consists of a substantiation of several academic and non academic engagements of the institution.

The year 2021 was not easy. With the pandemic still going on and keeping in mind of our students' health, we had to continue taking the classes in online mode. However, the entire team of MCKV Institute of Engineering did not let the challenges overpower them. In the midst of all the uncertainties, the entire faculty of the institution conducted several workshops, webinars to help the students to have a better understanding of their field of study and also to enhance their social interaction capacities.

Apart from that, the placement for this year remained to be very satisfactory.

I have just highlighted few of our achievements and I hope the year 2022 treats us well and we continue to conduct various academic and other activities that will guide our students to excel professionally and shape their personality and well being at the same time.

I would express my sincere thanks to the Committee members for sparing time together for publishing this issue in a professional way.

Parents of Indra Deb Bandyopadhyay, 4th year, ECE

We are the parents of Indra Deb Bandyopadhyay, who studies at MCKV Institute of Engineering and is presently pursuing B.Tech in Electronics and Communication Engineering and is currently in his final semester. Since the beginning, we have liked the fact that the Professors and staff are very caring. Even during challenging times of the global pandemic, the faculty ensured every students' doubts were taken care of. They focussed on not only the academic part but also closely worked with the students ensuring minimal mental stress and maximum efficiency. Here, not only education is provided but the overall personality of our child is

also groomed to prepare him for his future. The college library regularly upgrades itself with relevant material for studying. The college also provides a comprehensive curriculum to the students along with various opportunities to explore their latent talents. Given the extent to which the pandemic has impacted everyone, we wanted to compliment the teachers at MCKV Institute of Engineering for the way they have handled the necessary move to online instruction. While our son would much prefer to be in college and in class, but we know that he is learning. We are thankful to the college for making our son capable enough to flourish in the future and become a resourceful person.

What our Alumni says

MCKVIE is the tree that has given me shelter of quality education, values, principles and the spark to move ahead in life. MCKVIE is the root embedded inside every alumni and student's heart that will always be present wherever they go around the globe. College faculties treated us like their child and always mentored, motivated each and everyone. Being a part of ECE department, I am also thankful to every professor who always tried their best to glow the knowledge bulb inside every student. Not only lectures delivered by professors of ECE department were really helpful but also a value addition which cannot be learned from only text books. The lab faculties of ECE department along with excellent lab facilities also helped to relate our learning with real world. Not only academic part but MCKVIE always taught us to be a good human being. Rotaract club, Swami Vivekananda centre for positive thinking and different events inside college used to bring oxygen apart from our daily academics. I am really glad and proud that I got chance to get admission in MCKVIE ECE department which have planted seed of knowledge, enthusiasm and motivation inside my mind.

"College life is that part of your life that you are going to relive in your memories till you breathe." MCKV Institute of Engineering - my alma mater. MCKV Institute of Engineering is the place from where a new journey in my life began. It's the institution that shaped me professionally. I am proud to be a part of this prestigious institution's family for 4 years. I pursued B.Tech in Computer Science and Engineering. The department provided us with top notch education, with particular stress on various technical topics that were being embraced by the industry at that time. My college pushed us towards innovative thinking, and assisted in personal growth. All the faculty members were truly passionate about teaching. They were there to help in all ways possible. We could approach them even when we needed guidance on our personal lives. The time spent in college is laced with many cherishable memories. I am very happy with how MCKV Institute of Engineering has shaped me as both a person and a professional. This college gave me some of the closest friends of my life. I am really proud of and fortunate to be a part of MCKV Institute of Engineering!!! I miss my college life.
